Hydraulic Grab

AVAILABLE FOR 1T-36T

One of Aussie Buckets best sellers our Hydraulic Grab, also known as a Grapple or Rock Grab, delivers robust performance with a single ram and 5-finger interlocked design. Crafted from 400-grade steel with optional HARDOX upgrades, it offers superior abrasion resistance. Safety features include an integrated balance valve, ensuring durability and precision handling across applications. Customisable configurations available.

Our Hydraulic Grab provides unrivalled quality at a highly competitive price, with added value through features such as the balance valve and manifold distribution blocks, which enhance both performance and durability.

The result is a trusted, robust solution that excels across a variety of application with optimal control, precision, and performance, outperforming traditional thumbs and mechanical grabs. A standout feature, our manifold distribution blocks, located on the ears, protect the main cylinder by preventing damage during hose snags, while the integrated balance valve ensures smooth and safe operation in demanding environments.

This fourth-generation model is the result of extensive customer feedback, allowing us to perfect the balance between bite force and opening width, maintaining our position as an industry leader and high-volume seller.

Specifications

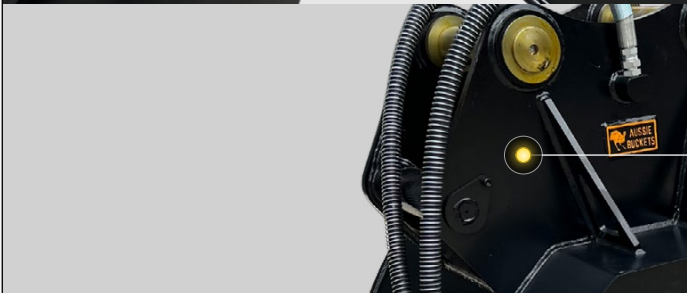

Tonnage	Max Open (mm)	Width (mm)	Weight (kg)	Flow (L/Min)	Pressure (Bar)
1.0-1.4	400	400	75	20-30	80 - 110
1.5-2.5	610	400	90	20-30	80 - 110
2.6-4	753	430	177	20-40	100 - 110
4.5-7	863	490	304	50-100	110 - 140
8-10	1036	588	410	50-100	120 - 160
11-18	1243	700	636	90-110	150 - 170
20-24	1554	820	1155	100-140	160 - 180
24-28	1800	1170	1360	120-160	170 - 200
29-36	1800	1170	1680	140-180	180 - 220

Features

Oversized Single Ram

Easy mount/dismount mechanism, saving time and boosting overall operational efficiency.

Manifold Distribution Blocks

Larger opening and greater bite force than competitor models to handle bigger, heavier loads securely and efficiently.

Five-Finger Interlocked Webbed Design

Securely handle various objects with maximum capacity. Complete jobs in a fraction of the time.
