# Heavy Duty Stick Rake

AVAILABLE FOR 1.2T-36T

Our Heavy Duty Stick Rake also known as a Root Rake, Soil Rake, or Tyne Rake is our next-generation land-clearing tool, designed for superior durability and efficiency.

Developed through extensive research and development, this rake is engineered to mitigate torsional stress on the tynes, preventing deformation while enhancing productivity with its hybrid push-pull design.

Built for maximum strength and longevity, the Stick Rake features high-strength tynes, an integrated head bracket, a reinforced interlocking rod, reinforced gussets, and reinforced cutters for exceptional durability in demanding conditions.

Operators benefit from 100% customisation over width, tyne thickness, and spacing, ensuring the rake is perfectly suited to each job site.

The superior tyne geometry, ultrasonic-tested welds further improve structural integrity and resistance to wear.

Ideal for land clearing, root removal, and soil preparation, our Heavy Duty Stick Rake provides unmatched strength, efficiency, and adaptability, making it an essential tool for earthmoving, agriculture, and forestry applications.

## Specifications

Tonnage	Width (mm)	Tyne Thickness (mm)	Weight (kg)
1.2 - 1.8	900	14	58
2 - 4	1000	16	97
4.5 - 7	1220	18	260
8 - 9	1500	18	278
10 - 16	2000	20	440
17 - 24	2105	25	800
25 - 36	2200	25	1000

### Features

#### High-Strength Tynes

More durable tynes that withstand harsh conditions, tackling tough debris without bending or requiring frequent repairs.

#### Reinforced Cutters

Cutters between tynes add strength and versatility, easily handling smaller materials and clearing stubborn debris.

#### Hybrid Push-Pull Design

Enables pushing or pulling materials, offering dual functionality and wide application use.
