# Hydraulic Tree Shear

AVAILABLE FOR 4T-30T

Aussie Buckets' Hydraulic Tree Shear also known as a Tree Cutter Attachment, or Tree Trimming Attachment is designed for efficiency, safety, and durability, and is an essential tool for professional forestry work or agricultural clearing, delivering unmatched performance in even the toughest environments.

Provides powerful and efficient tree felling with its single-ram design and wide clamp opening, this attachment ensures trees are securely gripped and felled with ease.

Constructed for maximum durability, the shear features a NM400 body, a 355 mild steel hitch, and a HARDOX 500 blade, built to withstand extreme wear and torsional forces.

To enhance longevity and minimise downtime, replaceable blades also allow for cost-effective maintenance.

For added operator safety and attachment protection, the Tree Shear comes equipped with mast support, ensuring trees remain stable and upright during cutting, whilst hose guards prevent damage to hydraulic components. Each unit includes hydraulic hoses with machine-side couplers, ensuring quick and hassle-free installation.

## Specifications

| Tonnage | Opening Size (mm) | Maximum Tree Diameter (mm) | Pressure (Bar) | Flow (lpm) | Weight (kg) |
|---------|-------------------|----------------------------|----------------|------------|-------------|
| 4 - 6   | 564               | 200                        | 180            | 25 - 30    | 265         |
| 8 - 10  | 607               | 300                        | 200            | 30 - 35    | 420         |
| 12 - 18 | 847               | 350                        | 220            | 60 - 65    | 1160        |
| 20 - 30 | 995               | 500                        | 220 - 230      | 80 - 100   | 1560        |

### Features

#### Powerful Single Ram

Powerful single ram minimises cycle time, clearing trees in seconds for improved efficiency.

#### Mast Support

Keeps trees stable and straight when cutting, ensuring operator safety.

#### Wide Clamp Opening

Securely grip trees and materials with a wide clamp and curved guide, enhancing efficiency.
