Mulcher

AVAILABLE FOR 5T-30T

The Aussie Buckets Mulcher also known as a Stump Grinder or Wood Chipper is designed for land clearing, stump grinding, and vegetation management, delivering powerful performance in even the toughest conditions.

Equipped with a bite limiter rotor and footing constructed from HARDOX, this mulcher minimises wear on components, prevents rotor stalling, and ensures a smoother, more efficient cutting process. The HARDOX bite limiter further enhances efficiency, ensuring reliable operation in dense vegetation without unnecessary setbacks.

Featuring interchangeable die steel or tungsten carbide blades, the mulcher provides exceptional durability and

a fine, consistent cut, allowing for closer proximity to the ground and a superior finish.

Safety is paramount, which is why the Aussie Buckets Mulcher includes a rear safety chain guard to control debris spread and reduce exit speed, making it a safer choice for operators and nearby workers.

This mulcher is a must-have for forestry, land clearing, and agricultural applications, ensuring powerful and precise vegetation removal with minimal downtime.

Specifications

Tonnage	Weight (kg)	Total Length (mm)	Cutting Length (mm)	Flow Rate (lpm)	Pressure (Bar)	Max Cutting Diameter (mm)	Blade Amount	Speed (rpm)
5 - 9	650	1186	668	60 - 150	245	250	11	1500 - 3100
10 - 16	1000	1487	905	90 - 150	245	300	16	1500 - 2500
17 - 30	1500	1963	1303	140 - 240	245	400	24	1500 - 2600

Hydraulic Hose Distribution Blocks

These blocks help protect the motor by managing hydraulic flow and preventing damage from hose snagging, ensuring longevity and minimal downtime.

Interchangeable, Reversible, and Replaceable Blade

Customise the mulcher for various applications with our two interchangeable blade types. Die Steel Blade: Choose optimal for superior and accurate cutting performance, ideal for tasks requiring precision and clean cuts.

Rear Chain Safety Guard

A powerful, high-torque motor which drives efficiency in operations accompanied with a rubber coupling between the motor and shaft to reduce vibration and absorb shock. This ensures smooth, reliable and consistent operation.
