Ripper

AVAILABLE FOR 1T-65T

Aussie Bucket Rippers, also known as Rock Rippers, Single-Tooth Rippers, Shank Rippers, or Tyne Rippers, are built for exceptional penetration and durability. Engineered with advanced shank geometry, they deliver superior performance in prying, loosening compacted ground, and removing roots across the toughest surfaces. Constructed from 400-grade steel with additional high-tensile wear plating on high-contact points, these rippers are designed to absorb extreme stress and withstand heavy use.

The Single Tyne Ripper ensures efficient ground-breaking

with a replaceable tooth for easy maintenance. A built-in lifting hook also enhances transportability, making it practical for site operations.

Whether breaking through rock, clay, or compacted soil, the Heavy Duty Ripper provides maximum force with minimal effort, reducing strain on machinery and increasing productivity. Custom steel grades are available on request for specific site conditions, ensuring tailored durability.

Specifications

Tonnage	Thickness (mm)	Weight (kg)	Height (mm)
1 - 2.7	35	37	566
2.8 - 4.5	50	80	690
5 - 10	55	130	935
11 - 18	65	245	1062
19 - 24	80	450	1076
25 - 30	80	490	1280
30 - 38	90	636	1350
40 - 45	100	750	1420
45 - 55	110	1100	1499
55 - 65	120	1400	1809

Features

Replaceable High Penetration Tooth

Minimal downtime and extended longevity with replaceable teeth.

Heavy Duty Single Tyne

Robust design ensures durability and longevity, effortlessly ripping, prying, and breaking tough surfaces.

High Strength Reinforced Steel Construction & Plating

Enhanced shank geometry boosts performance and penetration, while stress absorption increases attachment lifespan.
