Rotary Screening Bucket

AVAILABLE FOR 1.5T-50T

Aussie Buckets' Rotary Screening Buckets also known as Screening Drums, Trommel Buckets, or Rotating Sifters are designed for efficient material separation, allowing for seamless screening of topsoil, stone, demolition waste, and more. Featuring interchangeable mesh screens ranging from 10mm to 120mm (or 10mm to 60mm for smaller models), the screen size can be fully customised upon request to meet specific site requirements.

Built to endure harsh Australian environments, including underwater applications, our Screening Buckets are

equipped with a waterproof hydraulic motor, ensuring reliable performance in all conditions.

The bucket body is constructed from NM400 and 460 mild steel, with a 355 mild steel hitch and NM400 screens, delivering exceptional strength and durability.

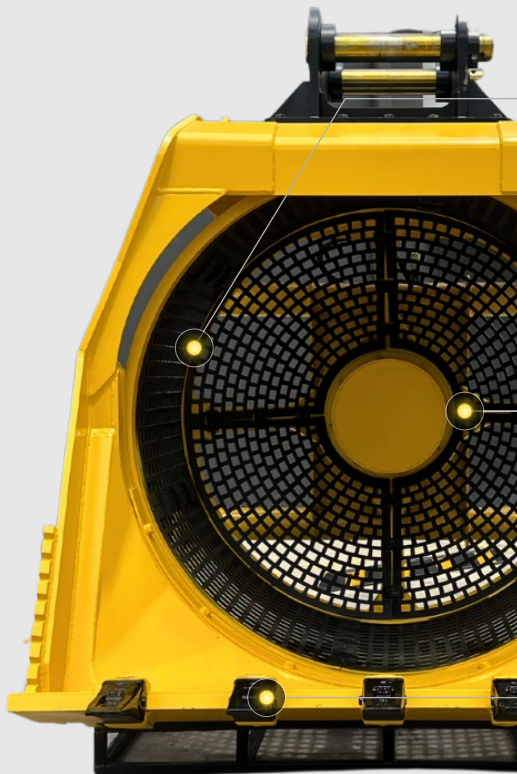

Ideal for construction, landscaping, and wastemanagement applications, our Rotary Screening Bucket offers superior screening efficiency, durability, and adaptability, making it an essential tool for any material processing operation.
